

# ABSOLYTE<sup>®</sup> GP

## SINGLE CELL MODULES SPECIFICATIONS

# ABSOLYTE® GP

## THE WORLD LEADER IN VRLA BATTERY POWER

- Environmentally friendly positive grid alloy provides reduced hazardous material content<sup>1</sup> and allows global recycling.
- Patented Lead-Calcium-Tin-Silver positive grid alloy provides long life in both float and cycling applications.
- Absorbed glass mat (AGM) separators provide >99% recombination efficiency.
- Low resistance of the glass mat improves high rate discharge performance.
- Cells are housed in protective, individual steel trays with convenient lifting handles for easy transport to remote locations.
- The single cells may be operated in the horizontal (preferred) or vertical position.<sup>2</sup>
- No water additions are required.
- Periodic visual inspections, voltage readings and connection retorquing is all that is required.

1. Compared to Absolyte IIP  
2. 50G single cells only.  
3. When operated per I&O Manual

## APPLICATIONS

- Railroad Signal and Communications
- Photovoltaics
- Cellular Radio
- Alternative Energy Systems
- Telecommunications

## ADDED FEATURES & BENEFITS

- Does not require separate battery room
- Can be integrated into other equipment enclosures
- Freezing tolerant
- Deep discharge recovery
- Accepts high rate charge
- Enhanced Post Access for ease of maintenance and battery health
- Globally Recyclable
- Greater use of reprocessed materials compared to prior Absolyte products.

## CELL SPECIFICATIONS

**Design Life** — 20 Years in Float Applications at 25°C (77°F)<sup>3</sup>

**Container and Cover** — Polypropylene is standard. Flame retardant, UL94 V-0/28% L.O.I. is optional.

**Separators** — Spun glass, microporous matrix.

**Safety Vent** — 3-10 PSI opening pressure, self-resealing.

**Terminals** — Solid copper insert.

**Positive Plate** — Patented Lead-Calcium-Tin-Silver grid alloy.

**Negative Plate** — Lead calcium grid alloy.

**Self Discharge** — 0.5 to 1% per week maximum @ 25°C (77°F).

**Float Voltage** — 2.23 to 2.27 VPC (2.25 recommended) @ 25°C (77°F).

**Cycle Life** — 1200 Cycles to 80% DOD at 25°C (77°F)<sup>3</sup>

**Operating temperature** — Temperature excursions between -40°C (-40°F) to +50°C (122°F) allowed (battery performance and life will be affected)

Exide Technologies Industrial Energy is a global leader in motive power battery and charger systems for electric lift trucks and other material handling equipment. Network power applications include communication/data networks, UPS systems for computers and control systems, electrical power generation and distribution systems, as well as a wide range of other industrial standby power applications. With a strong manufacturing base in both North America and Europe and a truly global reach (operations in more than 80 countries) in sales and service, Exide Technologies Industrial Energy is best positioned to satisfy your back up power needs locally as well as all over the world.

Based on over 100 years of technological innovation the Network Power Division leads the industry with the most recognized global brands such as ABSOLYTE®, GNB FLOODED CLASSIC™, MARATHON®, ONYX™, RELAY GEL®, SONNENSCHWEIN®, and SPRINTER®. They have come to symbolize quality, reliability, performance and excellence in all the markets served.

Exide Technologies takes pride in its commitment to a better environment. Its Total Battery Management program, an integrated approach to manufacturing, distributing and recycling of lead acid batteries, has been developed to ensure a safe and responsible life cycle for all of its products.
